ClearOne®

ClearOne is a global solutions provider of audio visual communications. The company designs and develops conferencing, collaboration, streaming and conferencing solutions including tabletop conference phones, VoIP tabletop conferencing, and premium and professional audio conferencing systems.

ClearOne

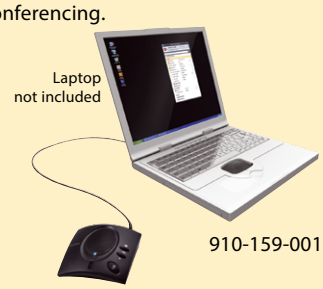
CHAT® Series

Personal USB Speakerphones Provide Superior Audio Clarity and Simple, Plug-and-play Compatibility.

The CHAT® 50, 60-U (Skype™ Certified) and 70-U (Microsoft® OCS™ and Lync™ compatible) are personal, USB-powered speakerphones that connect to a wide variety of PC and MAC devices, providing echo-free, crystal-clear, hands-free audio for audio/video conferencing or audio playback with laptops and cell phones. Compact, rugged form factors travel with you, while being sleek enough for desktop conferencing.

The personal series of CHAT speakerphones features ClearOne's market-leading HDConference™ audio technology for crystal-clear conferencing sound.

- Proprietary echo and noise-cancellation algorithms ensure crystal-clear audio
- Full-duplex sound engages microphones and speakers simultaneously so participants can speak and listen
- Automatic gain and level controls adjust mic and speaker levels
- On/off hook functionality while using Skype or Microsoft Lync (CHAT 60-U & CHAT 70-U)
- Adaptive modeling continuously samples room acoustics improving speech intelligibility
- Sensitive microphone provides audio pickup as far as 8 feet away
- Powerful loudspeaker for rich, clear conferencing or audio playback
- True plug-and-play operation



910-159-001

Portability:

- Rugged enough to toss into your bag and take on the road
- Powered through USB (CHAT 50 Plus includes power supply and analog input for mobile use

Chat® Series Group/Executive

Speakerphones Deliver Rich, Full-duplex Audio.

The CHAT® 150, 160 (Skype Certified) and 170 (Compatible with Microsoft OCS and Lync) connect to PCs and MACs, providing rich, full-duplex audio conferencing. Use with our COLLABORATE video conferencing solution and many other full-duplex applications (VoIP softphones, web collaboration applications, instant messaging), connected with enterprise phone systems (ad-hoc bridging capabilities allow a USB/analog mix) or simply use as a loudspeaker for rich audio playback. Breakout box options provide multiple connectivity options with enterprise telephone handsets, PCs/MACs and videoconferencing systems.

- ClearOne's, market-leading, HDConference™ audio technology • Proprietary echo and noise cancellation algorithms ensure crystal-clear audio
- Full-duplex sound engages microphones and speakers simultaneously so participants can speak and listen
- Automatic gain and level controls adjust mic and speaker levels
- First-mic priority intelligently focuses mic levels based on who is speaking
- Adaptive modeling continuously samples room acoustics improving speech intelligibility
- Built-in, three-element microphone array covers 360° audio pickup as far as 12 feet away
- Powerful, loudspeaker provides rich, clear conferencing or audio playback
- Wideband audio frequency response (20Hz-20kHz)
- Powered using USB port • Simple audio bridging between PC applications and analog telephone
- Breakout box for further connection options (enterprise telephones, video conferencing) • True plug-and-play operation

VoIP, Full-Duplex Tabletop Conferencing Phones

MAX® IP

Wired Expandable, VoIP Full-Duplex, Conferencing Phones

With MAX IP and MAXAttach IP, customers with SIP-based VoIP systems can now enjoy outstanding audio clarity and superior room coverage. Expansion for larger rooms is as simple as daisy-chaining up to four phones, each complete with microphones, speakers and controls for exceptional sound distribution and decentralized control.

SIP Suite of Features

- 3-way calling - allows for ad-hoc conferences without need for a conference bridge
- VLAN tagging - allows users to manage bandwidth usage on the network
- TLS & SRTP encryption-ready - secures voice communications over the network
- Field upgradability - allows users to easily download firmware upgrades from ClearOne website and load directly into the conference phone
- Great for executive offices and small to larger conference rooms with expansion kits (expandable up to four linked phones)

Professional Audio Conferencing Systems

Converge™ Pro

The Converge Pro product line is a complete audio system that delivers rich functionality with imroved audio performance, enhanced management, and simplified configuration for audio conferencing and sound reinforcement applications. It is ideal for large-scale conferencing venues, such as board rooms, conference rooms, auditoriums, courtrooms, convention centers and hotels, distance learning facilities, training rooms, houses of worship, and telemedicine facilities.

Features:

- Superior audio: advanced echo/noise cancellation, improved duplex performance, adaptive modeling to ambient noise
- Network management: Web-based control console, integrated Ethernet and USB, SNMP and HTML management, diagnostic console
- Simplified configuration software: drag-and-drop A/V and channel objects, selectable views – unit, matrix, channel
- Application flexibility: new 8i input-only system, ground-breaking sound reinforcement feature set, automated push-to-talk AEC function
